Overview

Machine learning is the algorithmic approach to learning from data. The course also covers aspects of data mining, the application of machine learning to obtain insight from data. In this course machine learning algorithms are placed in the context of their theoretical foundations in order to understand their derivation and correct application. Machine learning also is an empirical science, where performance of algorithms must be rigorously evaluated on datasets. Completion of this course will contribute to further learning in advanced topics such as deep learning, bioinformatics, computer vision, and robotics. Topics covered in the course include: linear models for regression and classification, local methods (nearest neighbour), tree learning, kernel machines, neural networks, unsupervised learning, ensemble learning, and learning theory. To expand and extend the development of theory and algorithms presented in lectures, practical examples will be given in tutorials and programming tasks during the project.

Conditions for Enrolment

Prerequisite: COMP9021

Equivalent Courses

Course WENG3007
WENG3007 - Machine Learning (Bengaluru)

Exclusion Courses

Course MATH5836
MATH5836 - Data and Machine Learning

Course WENG3007
WENG3007 - Machine Learning (Bengaluru)

Course ZZSC5836
ZZSC5836 - Data Mining and Machine Learning

Delivery

Collapse all

In-person - Standard (usually weekly or fortnightly)

Delivery Mode In-person

Delivery Format Standard (usually weekly or fortnightly)

Indicative Contact Hours 5

Please note that the above delivery information is an indication on how this course may be delivered within the year. Delivery mode(s) for each term can be viewed on other sources such as myUNSW and class timetable site.

This Handbook is a comprehensive catalogue of our offerings and includes courses that can be taken to satisfy program requirements irrespective as to their availability for a particular year. Availability of courses is best checked using filters on this site or on the class timetable site.
